Portfolio: <https://portfolio-zeta-flame-88.vercel.app/>

Professional Summary

Full-stack developer focused on building AI-powered productivity and workflow systems using React, Node.js, PostgreSQL along with integration of REST APIs. Experienced in designing responsive web applications with authentication, analytics dashboards, and secure multi-user architecture. Passionate about building scalable products and solving real-world workflow problems.

Technical Skills

Languages: Python, JavaScript, C

Web Development: React, HTML5, CSS3, REST APIs

Backend & Database: PostgreSQL, Node.js, Supabase, SQL

Tools: Git, GitHub, Vercel, Render

Concepts: Authentication Systems, Responsive Design, Data Structures & Algorithms, Component-Based Architecture, Object-Oriented Programming, Asynchronous Programming

Projects

FounderOS | React, Supabase, PostgreSQL, Gemini API, Vercel, Resend

GitHub: github.com/anudharmik/founder_dashboard

Live: <https://founder-dashboard-five.vercel.app/>

- Built an AI-powered full-stack productivity platform for tracking goals, tasks, and execution workflows
- Integrated external APIs including Gemini AI to power productivity insights and workflow automation.
- Designed secure multi-user architecture using Supabase authentication and Row Level Security
- Implemented secure authentication and protected user workflows using Supabase Auth
- Developed analytics dashboards with productivity scoring, task completion tracking, and weekly progress visualization
- Integrated email notifications and reminders using Resend
- Designed and integrated backend-driven workflows for authentication, task management, analytics, and AI-powered recommendations.
- Deployed on Vercel & Render

Automated Outreach Pipeline | Node.js, Ocean.io, Prospeo, Eazyreach, Brev

GitHub: github.com/anudharmik/outreach-pipeline

- Built an end-to-end outreach automation system that discovers similar companies, identifies decision-makers, resolves verified work emails, and automates personalized outreach campaigns.
- Integrated multiple third-party APIs and designed a modular workflow for prospect discovery, contact enrichment, email verification, and outreach delivery.
- Implemented error handling, data validation, deduplication, and safety checkpoints to ensure reliable execution.
- Developed a command-line application in Node.js with environment-based configuration and production-ready API integrations.

Certificates

Google Cloud Career Launchpad – Computing Foundations

Google Cloud Learning Services | April 2026

- Completed cloud computing fundamentals, hands-on labs, and practical exercises covering core Google Cloud concepts.
 - Earned certificate after successfully completing all courses and labs in the Computing Foundations track.
-

Education

Ramdeobaba University — Nagpur, India

3rd Year - *B.Tech in Computer Science and Engineering (Specialization in Artificial Intelligence and Data Science)* (Expected May 2028)

CGPA: 8.2
